Education

University of Maryland, College Park

Aug 2023 – May 2027

Bachelor of Science in Computer Science

GPA: 3.7/4.0

Relevant Coursework: Object Oriented Programming, Data Structures & Algorithms, Calculus 2, Linear Algebra, Data Analytics, Computer Systems, Physics, Statistics, Discrete Math, Organization of Programming Languages

Interests: Robotics, Computer Vision, Finance, Tennis, Volleyball, Running, Basketball, Traveling, Cooking

Skills

Programming Languages: Java, JavaScript, C, OCaml, Rust, SQL, HTML/CSS, TypeScript

Libraries/Frameworks: Agile, React, MongoDB, NodeJS, MSSQL, REST-API, Spring Boot, Mockito, Pandas, NumPy, MediaPipe, Apache Tomcat, AWS, pgAdmin, PostgreSQL, Flask, CucumberJS, Playwright, Git, Jenkins, WebRTC

Experience

Fiserv

June 2025 – Aug 2025

Software Engineering Intern

- Modernized the Disputes WorkSpace application by implementing a ReactJS + TypeScript communication interface, reducing paper-based fraud/dispute case alerts by 90% and enabling real-time email/SMS updates.
- Built scalable backend APIs with Spring Boot and MSSQL to support dynamic search, creation, and management of communication events and client-specific assignments in the dispute processing workflow.
- Wrote 80+ unit tests with Mockito achieving 98% code coverage, and conducted end-to-end testing with CucumberJS and Playwright to ensure 100% scenario success prior to code deployment to production.

IpserLab LindoGourmet Startup

June 2024 – Nov 2024

Software Engineering Intern

- Built and deployed a full-stack recipe database platform using Apache Tomcat and pgAdmin, streamlining storage/retrieval and improving query performance by 40%.
- Redesigned the interface for seamless mobile usability, resulting in a 40% increase in returning mobile users and a 27% longer average session time.
- Optimized data management techniques, reducing data redundancy by 30% and improving system capacity by 25%.

Armo Consultants

Nov 2022 – May 2023

Software Engineering Intern

- Implemented a merchandise marketplace shopping cart system for a client portal using Java, HTML, and JavaScript, enabling real-time item updates and improving checkout efficiency by 35%.
- Participated in Agile ceremonies, contributing to sprint planning, code reviews, and daily stand-ups.
- Refactored API integration and optimized client validation logic, minimizing input errors and user-reported bugs by 15%.

Projects

Jiggy: Modern Day Just Dance

April 2025 - Present

- Built a real-time web app that compared user dance movements to a reference video, delivering live accuracy scores and visual feedback that helped users perform movements 30% more accurately and learn routines 25% faster.
- Implemented pose detection and motion analysis using MediaPipe, NumPy, and Pandas, integrating video segmentation and skeleton comparison to measure 30° angle thresholds between limbs with model serialization via Pickle.
- Developed the front-end and back-end with Flask, Socket.IO, WebRTC, JavaScript, HTML, and CSS for seamless video streaming and interactive performance tracking, allowing for 10+ concurrent users.

SmallC Compiler Optimizer & Type Checker

March 2025

- Implemented a lexer in OCaml using regex and pipelined tokens through a CFG parser to produce a robust AST representation of toy-version of C, supporting variable binding and control flow.
- Built an evaluator with constant folding, propagation, and branch folding, and integrated type inference and static checking to catch semantic errors, undeclared variables, and division-by-zero at compile time.

Auto-Hug Device for Sensory Overload

January 2024

- Engineered a wearable device that provides automated, easy access to Deep Pressure Therapy for individuals with sensory processing disorders such as Autism, ADHD, and Sensory Processing Disorder.
- Programmed the device's automated compression sequence, controlling pressure levels and timing through Arduino IDE.
- Conducted user testing with individuals experiencing sensory processing disorders, gathering feedback to refine functionality and improve user comfort.
